## Accelerating Time to Value for your organisation with BI testing

With the growing demands of the organisation to have a predictive analysis of the business, IT are constantly under pressure to provide confidence that the information is based on accurate and good quality data. Data which comes from different source systems and multiple business processes.

Testing is at the heart of everything Experior does and we offer an end-to-end test service for BI. Our consultants have a unique blend of business process knowledge, BI and Big Data expertise together with in-depth testing experience. The team is further enhanced by one of the industry's leading BI Subject Matter Experts.

We know that BI testing is more than testing reports and that Big Data is at the centre of a successful BI implementation. Therefore, our specialist BI Test team work with our proprietary big data accelerators

including an off-the-shelf BW test library, a BI testing methodology and operating models to simplify, speed up and mitigate risk to your BI implementation. We understand that BI testing is not done in isolation and we work at integrating seamlessly into your BI Centre of Excellence, BI Competency Centre or BI Factory.

In addition, we have a unique alternative to offshore testing in our dedicated UK based BI test centre which provides a balance of cost effective and high quality services.

*Put simply, we are the BI testing experts.*

We help make Halfords, Anglian Water, Brakes, UKPN, Homebase and Centrica a success.

To find out more about how our BI Test Team can help your organisation, please contact us on **01784 618 005** or email at **info@experiorgroup.com**

Experior  
is the only  
SAP certified  
partner in the  
UK dedicated  
to testing.
